# Tableau User Story | Sales Performance

## Introduction

This user story outlines the specifications for building two dashboards using tableau to help stakeholders, including sales managers and executives to analyze sales performance and customers.

# Sales Dashboard | Requirements

## **Dashboard Purpose**

The purpose of sales dashboard is to present an overview of the sales metrics and trends in order to analyze year-over-year sales performance and understand sales trends.

## **Key Requirements**

#### **KPI Overview**

Display a summary of total sales, profits and quantity for the current year and the previous year.

#### Sales Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

## **Product Subcategory Comparison**

- Compare sales performance by different product subcategories for the current year and the previous year.
- Include a comparison of sales with profit.

## Weekly Trends for Sales & Profit

- Present weekly sales and profit data for the current year.
- Display the average weekly values.
- Highlight weeks that are above and below the average to draw attention to sales & profit performance.

# Customer Dashboard | Requirements

## **Dashboard Purpose**

The customer dashboard aims to provide an overview of customer data, trends and behaviors. It will help marketing teams and management to understand customer segments and improve customer satisfaction.

# **Key Requirements**

#### KPI Overview

Display a summary of total number of customers, total sales per customer and total number of orders for the current year and the previous year.

#### **Customer Trends**

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

## Customer Distribution by Number of Orders

Represent the distribution of customers based on the number of orders they have placed to provide insights into customer behavior, loyalty and engagement.

## Top 10 Customers By Profit

- Present the top 10 customers who have generated the highest profits for the company.
- Show additional information like rank, number of orders, current sales, current profit and the last order date.

# Design & Interactivity Requirements

# **Dashboard Dynamic**

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year.
- Provide users with the ability to navigate between the dashboards easily.
- Make the charts and graphs interactive, enabling users to filter data using the charts.

## **Data Filters**

Allow users to filter data by product information like category and subcategory and by location information like region, state and city.
